Contact Information.

If you have questions, please do not hesitate to contact Nexus sales representative or your business contact.

Nexus policy and lifecycle definitions

Products reach the end of their lifecycle for a variety of reasons. These reasons may reflect market demand, technology driven innovations and product maturity. While this is an established part of the overall product lifecycle, Nexus considers it highly important to share all product state information with our customers and partners. This policy allows for adequate time to prepare for changes in availability of products and components, manage their development, and administer support or maintenance accordingly.

"End of Sale" (EOS) indicates that a product or a product release is no longer available for purchase, but Nexus will continue to provide support per maintenance agreements. EOS of a product Prior to EOS, customers will have the opportunity to make last-time purchases/buy of products and licenses.

"End of Life" (EOL) defines a product or a product release that is no longer available for purchase and will no longer be supported by Nexus. EOL is the final stage in the overall process. Once a product release has been classified as "EOL", there is no repair or replacement support, and Support is limited to documentation and downloads.
