

Digital Access component integrations

This article summarizes some integration possibilities

Integrate to resources via common standards

- [Set up RADIUS client in Digital Access](#)
- [Examples - Set up Nexus OTP and Nexus Mobile Text as 2FA](#)
- [Configure OAuth 2.0 in Digital Access](#)
- [OpenID Connect federation in Digital Access component](#)
- [SAML 2.0 federation in Digital Access](#)

Set up access to common resources

- [Set up access to Confluence with Digital Access as identity provider](#)
- [Set up access to G-suite applications with Digital Access as identity provider](#)
- [Set up access to Office 365 with Digital Access as identity provider](#)

Integrate to other Smart ID components

- [Set up Smart ID Messaging in Digital Access](#)
- [Set up push notifications in Digital Access](#)
- [Connect Identity Manager to Digital Access XPI to enable user provisioning](#)

Digital Access Extension Programming Interfaces (XPI)

- [Digital Access Extension Programming Interfaces \(XPI\)](#)
