

Nexus Documentation

Search

What are you looking for?

Full words or wildcards are required, for example, type 'auth*' to find authenticators, authenticate, authentication, etc. To search for parts of words, use the search field in the top bar.

Nexus Smart ID

The Nexus Smart ID solution provides easy-to-use modules for managing physical and digital access, physical access entitlement, two-factor authentication and single sign-on to digital resources, as well as certificates for enterprise use and for IoT devices.

IoT PKI

Nexus Smart ID IoT PKI is a flexible and scalable certificate authority (CA) software, which enables you to register, issue and manage electronic identities for devices in typical IoT use cases.

Nexus GO Services

Nexus technologies are available as services through [Nexus GO](#). The services enable you to focus on your core business, without having to worry about hardware, dedicated staff or maintenance. You can test many of the services for free before deciding to buy, and you get real-time reporting of your usage.

Products

For technical documentation, descriptions, tutorials, videos, etc on Nexus products, see [Products](#).

Support

For information on technical support of Nexus solutions, products, and services, see [Support](#).

Nexus Cidron

For technical documentation and videos on the Nexus Cidron RFID reader, see [Nexus Cidron](#).
