▼ Use case: Mass produce employee or external cards

Standard workflow

	Actor	Action	Option	Physical ID	Digital ID
1	Card production administrator	In PRIME Explorer: starts the process for batch card production.	-	✓	✓
2	PRIME	Generates a production order. Checks for each card, if the card is ready to produce. <ul style="list-style-type: none"> If not, then this card is skipped. 	-	✓	✓
3	CA	Issues a certificate. The certificate is stored in PRIME and on the card.	-		✓
4	Card production administrator	Produces card and verifies the result. <ul style="list-style-type: none"> If the production fails, PRIME aborts the workflow. 	-	✓	✓
5	Card production administrator	Selects if the order is complete, or if there are more cards to produce.	-	✓	✓
6	PRIME	If the order is complete, the workflow ends. <ul style="list-style-type: none"> If not complete, PRIME repeats the workflow from step 2. 	-	✓	✓

Use case: Activate employee or external card

If a signature pad is used, there is an option in the workflow to let the person give their signature when picking up the card.

Standard workflow

	Actor	Action	Option	Physical ID	Digital ID
1	Person	Receives the card.	-	✓	✓
2	Issuing authority or Registration officer	In PRIME Explorer: browses for the person and selects Activate card .	In USSP: Self-service user selects Activate card .	✓	✓
3	PRIME	Changes card state to Active .	Before the card being activated, the person signs on a signature pad, to confirm fetching the card.	✓	✓
4	PRIME	Sends activation mail to the person including PIN and PUK.	A PIN information letter is printed and handed to the person.	✓	✓
5	PRIME	Exports the card data to the PACS.		✓	✓
