

Nexus PRIME

Nexus PRIME is a product used for centralized identity and credential management. PRIME enables a consistent credential management process to ensure transparency and traceability in enabling identities for employees, student, and systems.

PRIME offers business process capabilities for identity issuance to increase the level of assurance. PRIME consists of administration tools, self-service, and delegated approval routines and is powered by entitlement into the IT and physical access environment.

News

2018-12-14

Nexus is proud to announce the availability of Nexus PRIME 3.9.

Main new features in this release:

- **Virtual smart card functionality**
The new Windows 10 [Nexus Personal Desktop App](#) introduces a Virtual Smart Card (VSC) functionality. Nexus PRIME provides standard workflows for VSC based on Nexus Personal.
- **New PRIME Designer user interface**
[PRIME Designer](#) is now a pure HTML5 application and the old webstart Designer is no longer available in PRIME 3.9. This means that PRIME Designer will now run on each up-to-date web browser without requiring a local Java. The usability of PRIME Designer is also improved in several areas.
- **New User Self-Service Portal**
With this release a brand new [PRIME User Self-Service Portal](#) is introduced. It contains updated technology, brand new look and feel, simplified configuration and improved usability.

For more information, see the [Release note Nexus PRIME 3.9](#).
