

Get started with Nexus GO PKI Cards

To get started with [Nexus GO PKI Cards](#), do the following:

1. Order the service:
 - a. **Contact Nexus.** Nexus will send you an onboarding form.
 - b. Fill in the onboarding form, including delivery address, billing information, etc. Nexus will send you a **starter kit** including initial employee cards and card readers, and credentials to the [Nexus Support portal](#).
2. Download software from the [Nexus Support portal](#):
 - a. Log in to the portal with the credentials provided by Nexus.
 - b. Download [Nexus Card SDK](#).
3. For helpdesk client computers, to be able to issue temporary cards, set up [Nexus Card SDK](#):

If registration officers need to be able to enhance photos before card production, then these clients must also have [Nexus Card SDK](#).

- a. Download the Card SDK software from the [Nexus Support portal](#). Log in with the credentials provided by Nexus.
 - b. [Install Card SDK](#) on the clients where temporary cards will be assigned.
 - c. Install the PKCS#11 driver file that you get from Nexus.
4. Set up smart card logon and set the CA certificate to trusted:
 - a. Save the CA certificate files from either of the delivered PKI cards.
 - b. [Set up smart card logon in Active Directory](#).
5. Test the service, for example smart card login to Windows and issuing temporary cards.
6. **Now, you are ready to order cards** for everyone in your organization. For more information, see [PKI Card Management tasks](#).

> [Contact Nexus](#) to order the service, or if you have any questions
