

# Nexus GO PDF Signing News

## 2019-04-09

Added description on how to [Sign document via Word add-in](#). Also added how to use an identity provider with the SAML attribute *userid*, see for example [Connect identity provider to PDF Signing](#).

## 2019-01-30

Added a summary of how documents are managed in Nexus GO PDF Signing. See [Document management in Nexus GO PDF Signing](#).

## 2019-01-15

Steps are added for how to create a new signing request from a previous one. See [Upload document to PDF Signing portal](#).

## 2018-11-12

The [PDF Signing API](#) and related documentation have been updated.

The documentation for Nexus GO PDF Signing has been restructured, and some more examples added. Information about [eIDAS compliancy](#) has been added.

New user guides for the PDF Signing portal have been added, see [PDF Signing user guide for signers](#) and [PDF Signing user guide for administrators](#).

## 2018-06-14

Nexus GO PDF Signing now includes an API. With the Nexus GO PDF signing API, you can build in creation of PDF signing requests into your own application. See [PDF Signing API](#).

## 2018-05-09

Nexus GO PDF Signing now supports SAML integration, which means that customers can use their own identity provider with the registered identities and authentication methods they already use for other purposes, to log in to the signing portal and sign documents. The connection to the identity provider needs to be configured in Nexus GO.

In the PDF signing portal, users can now also see the status of all current and previous signing requests.

## 2018-02-28

Nexus GO PDF Signing now supports Swedish BankID.

When adding a signing request, Swedish BankID can now be selected as Signing Method. Users can then sign with Swedish BankID or Swedish Mobile BankID.

## 2017-10-10

Nexus launches the service Nexus GO PDF Signing.
