

Freja eID

Freja eID is an electronic identity on your mobile device that allows you to log in, sign and approve transactions and agreements with your fingerprint or PIN. With Freja eID+, you will get an eID officially approved by the Swedish authority DIGG with the quality mark Svensk e-legitimation. You can configure Hybrid Access Gateway to only accept Freja eID+. For more information about Freja eID, go to <https://frejaeid.com>.

With the introduction of Freja eID, Hybrid Access Gateway now supports three different Swedish eIDs. It supports (Mobilt) BankID and Freja eID over a native interface and AB Svenska Pass over SAML. Freja eID and AB Svenska Pass are approved by the Swedish authority DIGG, Myndigheten för digital förvaltning (previously Elegitimations--nämnden) and are therefore compliant with eIDAS.

For more information, see [Set up Freja eID authentication](#).
