

Set up Forgerock as identity provider to Nexus GO PDF Signing

For a complete instruction on how to set up access to [Nexus GO PDF Signing](#) with Forgerock as identity provider (IDP), see this link:

- <https://github.com/technologynexus/nexusgo-forgerock>.

The configuration is based on SAML federation and is done in three steps: first preparation in Forgerock, then in Nexus GO PDF Signing and then the configuration is completed in Forgerock.
