

Mobile ID management

As part of the Smart ID solution, you can let your employees and external users authenticate to digital resources with their mobile phone using [Nexus Personal Mobile](#).

Personal Mobile can be enabled, activated, and deactivated in the Smart ID manager. For more information on the use cases and roles, see below.

Self-service use cases

- [Issue mobile ID to person](#)

Use case overview

Issue mobile ID

- [Enable person to use mobile ID](#)
- [Issue mobile ID to person](#)
