## Detailed feature list

### New features

JIRA ticket no	Description
PEX-212	Support for PKCS#7 signatures has been implemented.
PEX-219	German translation has been improved.
PEX-221	Support for the Ping command, to remotely retrieve client information, has been implemented.
PEX-224	Support for flexible handling of admin key has been implemented.
PEX-225	Changed naming conventions from Personal X to Personal Desktop App.
PEX-229	Support for remote deletion of VSC has been implemented.
PEX-248	Polling support for the provisioning process has been implemented.
PEX-261	PIN reset for file based p12 import has been implemented.

### Corrected bugs

JIRA ticket no	Description
PEX-189	It was not possible to have multiple certificates with the same common name.
PEX-206	When the PIN request was closed during provisioning, it made Personal Desktop App crash.
PEX-208	Personal Desktop App crashed in auth/sign when the addressed VSC had been deleted.
PEX-211	The PIN dialog was cancelled during soft token import, which created an incorrect message.
PEX-214	Personal Desktop App inserted unwanted data into sign response.
PEX-215	Auto creation of TPM reader for p12 import was not working.
PEX-237	Profile metadata was lost after re-installation of Personal Desktop App.
PEX-260	Import caused forced PIN change.
PEX-262	No certificate details were shown for an imported p12 file.
