

## Smart ID clients

As part of the Smart ID [Digital ID](#) solution, Nexus offers [Smart ID clients](#) for desktop and mobile that enables Windows logon, authentication and signing in web applications, cloud services, and desktop smart card environments.

The following clients are offered: [Smart ID Mobile App](#), [Smart ID Desktop App](#) and [Nexus Personal Desktop Client](#). Additionally, Nexus offers the [Smart ID Mobile SDK](#) to build custom mobile apps and the backend service [Smart ID Messaging](#) that includes [Hermod](#) and [Nexus Push Service](#).

For more information, see the following links:

### Smart ID Mobile App

**Use mobile virtual smart cards for authentication to digital resources, digital signing, email encryption and visual identification.**

For videos on how to download, activate, and log in with Personal Mobile, see [here](#).

### Smart ID Desktop App

**Use virtual smart cards on your desktop, Yubico yubikeys or ID06 cards for multifactor authentication (MFA) to digital resources, Windows logon, digital signing, email encryption and visual identification. Or use Smart ID Desktop App to encode smart cards.**

### Nexus Personal Desktop Client

**Nexus Personal Desktop Client is a smart card middleware integrating smart cards and security tokens and provides your users with intuitive two-factor authentication (2FA), digital signing, email encryption etc.**

### Smart ID Mobile SDK

**Smart ID Mobile SDK allows customers to integrate two-factor authentication (2FA) and signing in their own apps.**

## Smart ID Messaging

**Smart ID Messaging includes Hermod for authentication and signing and Nexus Push Service for managing push notifications to mobile apps.**
