| <b>Planned</b>     |

## Coming features

| Feature  | Status      | Products            |
|--|-------------|---------------------|
| <b>Token Agent Client</b><br>General improvements to the Token Agent Client in order to make it fully operational in real-life scenarios and as well a part of the Nexus Personal Mobile product portfolio.  | In progress | Personal Mobile SDK |
| <b>Dynamic App Branding</b><br>Make the app appearance neutral with capability to make parts of it dynamically branded during message exchange with back-end server. Static branding as previously offered will be discontinued.   | In progress | Personal Mobile     |
| <b>Windows Logon over BLE</b><br>Integrate Windows Logon over BLE functionality into Personal Mobile to utilise digital identities provisioned to the device, for secure remote login/unlock of Windows based laptops and computers.   | Planned     | Personal Mobile     |
| <b>Intunes and S/MIME support</b><br>Integration with Intunes for mobile device management (MDM).<br>Primarily for installation of S/MIME certificates in preparation for when Outlook will get S/MIME support on both Android and iOS in 2019.  | Planned     | Personal Mobile     |
| <b>Mobile Visual ID</b><br>Implement visual ID, by rendering physical card in Personal Mobile with authentication and signing certificates issued using standard workflows. Additional user data will be stored in ICAO passport standard, such as image, biometric template, and address. | Planned     | Personal Mobile     |
| <b>ECC Support</b><br>Support for elliptic curve cryptography (ECC).   | Planned     | Personal Mobile     |
| <b>AirWatch</b><br>Integration with AirWatch for mobile device management (MDM).   | Planned     | Personal Mobile     |

Nexus reserves the right to change the roadmap due to recent requests.
